The screenshot shows the IBM Watson IoT Platform dashboard. The top navigation bar includes 'Browse', 'Action', 'Device Types', and 'Interfaces'. A sidebar on the left contains various icons. The main content area displays a table of recent events for a device. The table has columns for 'Event', 'Value', 'Format', and 'Last Received'. The events are listed as 'data' with JSON values representing sensor readings. The 'Last Received' column indicates that the data was received 'a few seconds ago'.

The screenshot shows the 'Browse Devices' page in the IBM Watson IoT Platform. The page title is 'Browse Devices'. Below the title, there are two tabs: 'All Devices' and 'Diagnose'. A paragraph explains that the table shows a summary of all devices that have been added and can be filtered, organized, and searched. Below this, there is a search bar labeled 'Search by Device ID' and a 'Device Simulator' toggle. The main table lists the devices with columns for 'Device ID', 'Status', 'Device Type', 'Class ID', and 'Date Added'. The table shows one device, 'Assignment4', which is 'Disconnected' and of type 'ESP'. The 'Date Added' is 'Nov 2, 2022 11:26 AM'. At the bottom, there is a pagination bar showing '1 of 1 page'.
